DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 14-16, 35-42, drawn to a method of managing a communications disruption, classified in class 379, subclass 93.35.
- II. Claims 8-13, drawn to a method of establishing communication, classified in class 379, subclass 112.
- III. Claims 17-31, 43, drawn to a method of providing an identity of the calling party, classified in class 379, subclass 93.23.
- IV. Claims 32-34, drawn to a client system, classified in class 379, subclass 93.24.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in computer-telephone system which handles call-waiting interruptions but does not provide selection based on cost criterion, identity of a calling party or electronic mail messaging. Invention II has separate utility such as in a method of selecting between transceivers based on cost criterion but does not handle call-waiting interruptions, provide caller identification, or electronic mail. Invention III has separate utility such as in a method of providing caller identification but does not handle call-waiting

Art Unit:

interruptions, provide selection based on cost criterion or provide electronic mail messaging.

Invention IV has separate utility such as in a client system with electronic mail messaging that does not handle call waiting interruptions, provide caller identification, or provide selection based on cost criterion. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. **Any response to this action should be mailed to:**
